Where every *line* goes

Drawn to scale for a typical floor mirror with glass 45 cm wide and 150 cm tall. Different size? Scale every measurement by the same amount: glass width ÷ 45.

01 Measurements for a 45 cm glass

LINE	WIDTH	WHERE
Welcome	**29 cm**	Centred. Top of the "W" 13 cm below the top of the glass
TO OUR WEDDING	**22 cm**	Centred, 3.5 cm under the lowest point of Welcome
YOU LOOK	**13 cm**	Right edge 4 cm from the right of the glass, 64 cm down
Stunning	**15 cm**	Tucked under YOU LOOK, overlapping its baseline slightly
NOW LET'S CELEBRATE	**23 cm**	Right edge lined up with YOU LOOK, 74 cm down
Your names	**20 cm**	Left side, 117 cm down, at eye level for photos
Your date	**11 cm**	Under the names, nudged right

Leave the middle of the mirror clear: that's where your guests' reflections go in photos. Keep the names at about 115–125 cm from the floor of the glass, so they appear in group shots.

Order of work

1. Tape a level guide strip for each line before you peel anything.
2. Apply from the top down: Welcome, then each line below it.
3. Stand back 3 metres after each line and check it's straight. Phone photos help.
4. Peel the guide tape only when everything is on.

Make it *yours*

Your names and date use the same two fonts as the rest of the mirror. Both are in the **3_Fonts_for-your-names** folder, free to use under the SIL Open Font License.

02 Cricut Design Space

1. Install both fonts on your computer: double-click each file and choose Install. Restart Design Space.
2. Add a text box, type your names, pick **Great Vibes**.
3. Reduce **letter spacing** until each script letter just touches the next.
4. Select the text, click **Weld**. It's now one piece and cuts without gaps.
5. Resize to **20 cm wide** with the lock on.
6. For the date, type it in **Playfair Display Bold**, add a little letter spacing, and size it to 11 cm wide. No weld needed.

03 Canva (no machine)

1. Search Canva's fonts for "Great Vibes". If it isn't listed, upload the font file (uploading fonts needs Canva Pro), or use the white PNGs and type only the date.
2. Type your names and date, white text, and download as PNG or PDF.
3. Print at actual size, then trace onto the mirror with a white paint pen, as in the trace guide.
4. Or email the PDF to a local sign shop and ask for white or gold vinyl cut at 20 cm wide.

04 Good to know

- Use "&" from the cut files if you prefer it larger: **06_ampersand**, 4.5 cm.
- Short names (under 4 letters each)? Go to 16 cm wide so they don't look stretched.
- Dates read best with full stops: 25.10.2026.

05 What's in your lettering folder

- **1_Cut-files_SVG:** 6 ready-to-cut pieces, already welded
- **2_Canva_PNG:** each piece in white and gold
- **3_Fonts_for-your-names:** Great Vibes + Playfair Display Bold
